It seems to have the newer serial number. . Jun 7, 2019 After trying numerous options here is what worked for me. I would start there or at least try this first. Worth noting though this is in the first steps to a possible solution. You may need to do more work but I'd hope this got you on your way. Check your Model Number in the BIOS E.g. Asus Step 1. Look for the Model Number in the first few menu options. Click Advanced > Model Number > Enter Step 2.If you don't find it there do a reset. Reset the Tablet Press and hold the following: F2: Display Backlight Switch F5: Wlan F6: Lock

Now delete the serial number in the bios, use the serial number in Step 3 or try the other ways I described below if it's still not the right serial number. Where is the Serial Number located? How can I view or change the machine type (e.g. 32-bit vs. 64-bit)?
